# GDP, Above-the-line measures (ALM), and poverty

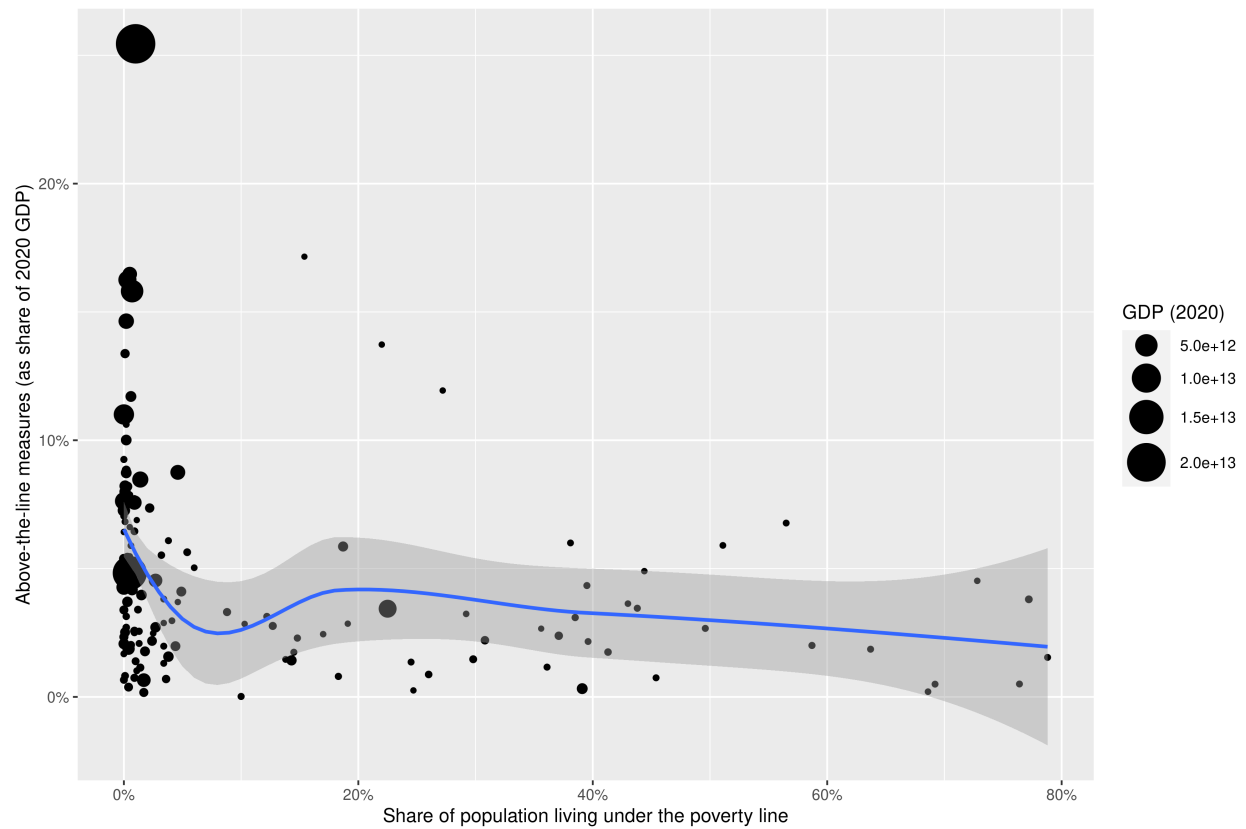

## Correlation matrix

## Poverty under \$1.90, ALM, and GDP

Does bigger economies (with fewer poor people) deployed bigger fiscal responses?

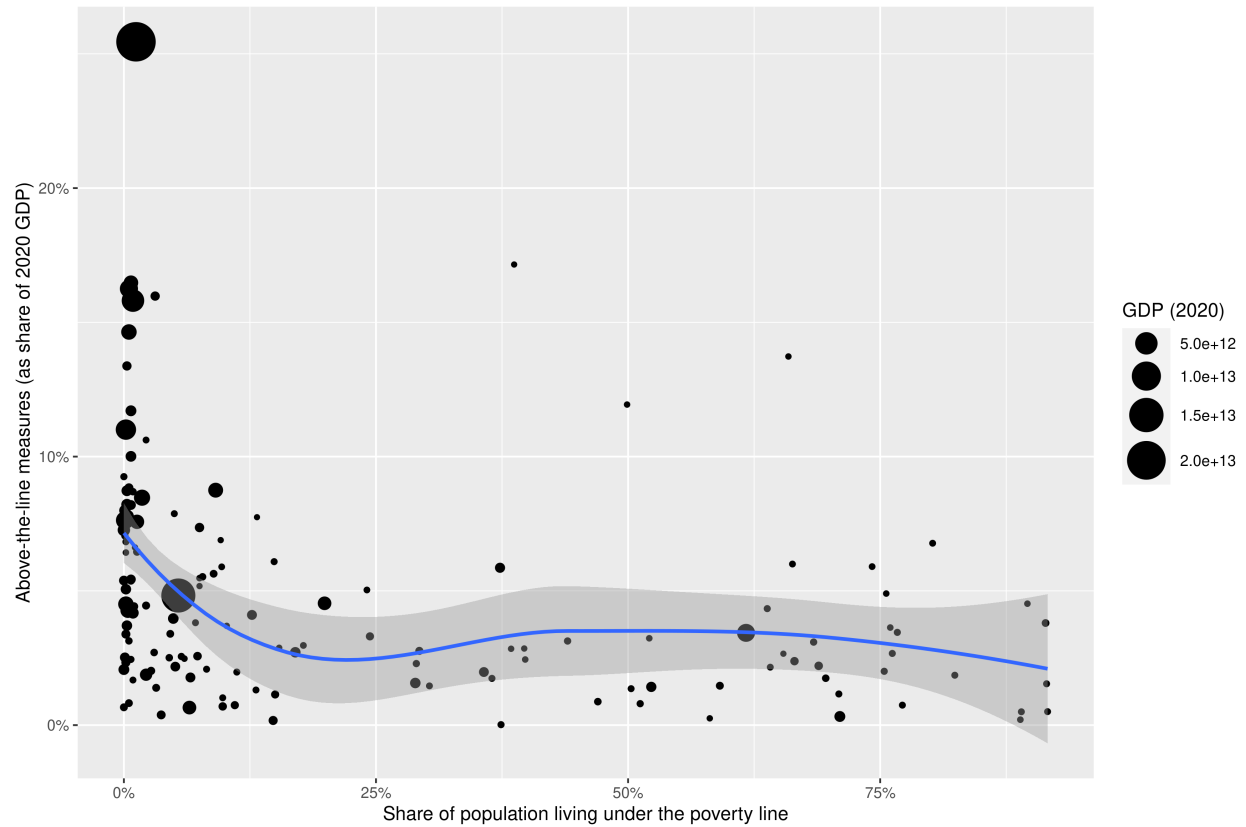

Share of population living under the poverty line (\$1.90),  
Above-the-line measures (as share of 2020 GDP),  
and GDP.

## Poverty under \$3.20, ALM, and GDP

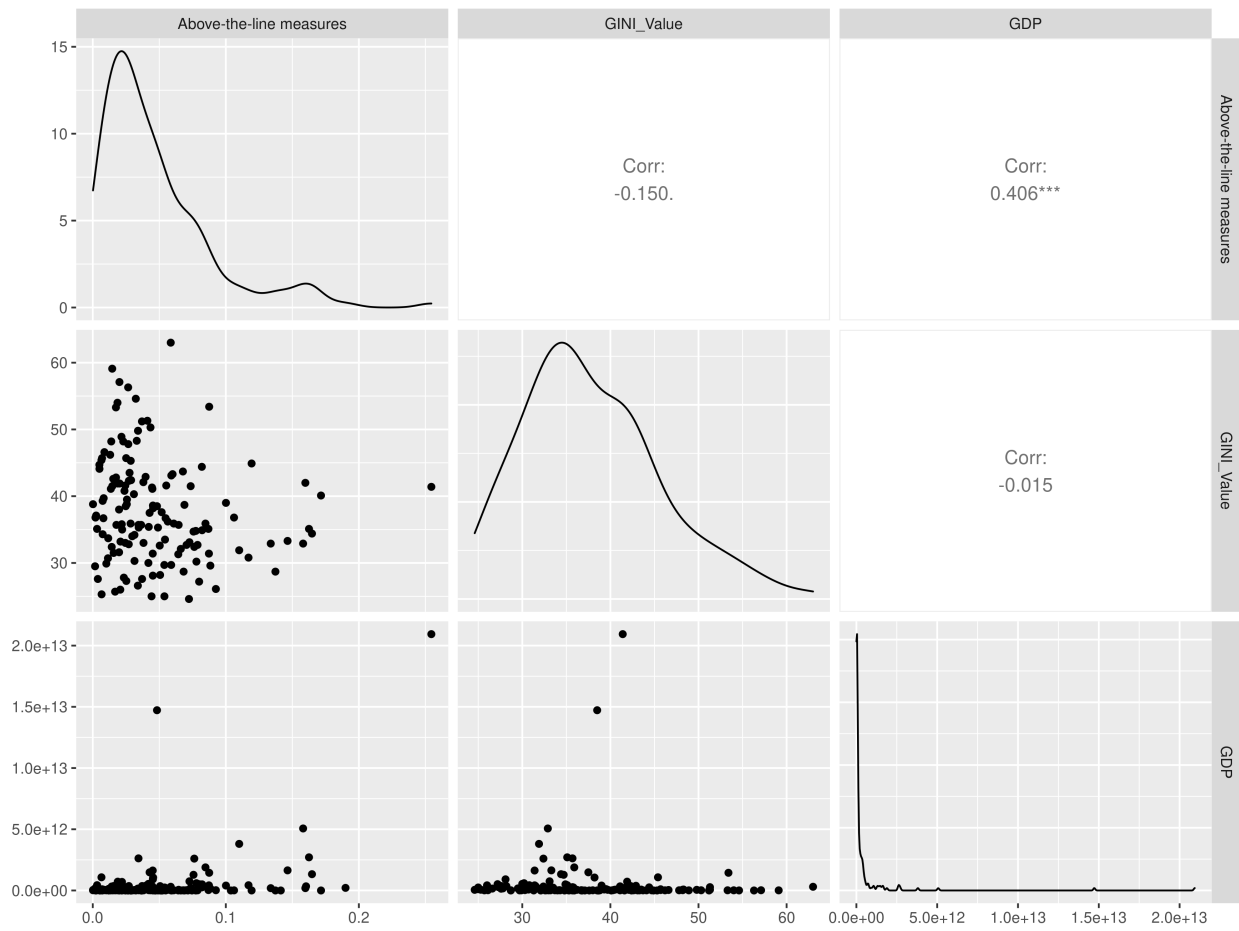

Does bigger economies (with fewer poor people) deployed bigger fiscal responses?

Share of population living under the poverty line (\$3.20),  
Above-the-line measures (as share of 2020 GDP),  
and GDP.

# GDP, Above-the-line measures (ALM), and inequality

## Correlation matrix

## Gini Index, ALM, and GDP

Does bigger economies (with less inequality) deployed bigger fiscal responses?

Share of population living under the poverty line (\$3.20),  
Above-the-line measures (as share of 2020 GDP),  
and GDP.
